

Join the Green Side and stay at the Mespil Hotel

Environmental Policy

WATER MANAGEMENT

Achieve a 10% reduction in water consumption per occupied room by the end of 2026 to 225 litres compared to the 2025 figure of 250 litres. Encourage our guests to refill their water bottles at our lobby water station.

REDUCE WASTE TO LANDFILL

Reducing our general waste amount by 20%, to 27 tonnes compared to 33 tonnes in 2025.

ENERGY EFFICIENCY

Reduce energy consumption by 3% per guest night. Was 89.5MJ/guest night in 2025 reduced to 85MJ/guest night. Continue to use 100% renewable electricity with FloGas

PACKAGING & PLASTIC REDUCTION

Reduce unnecessary packaging by working with our suppliers thus reducing our recycling waste by 5% to 17 tonnes

EMPLOYEE TRAINING & ENGAGEMENT

100% of staff receive training in sound environmental policies & to enact our goals. Grow our green team committee to 7 members and hold quarterly meetings.

CARBON FOOT PRINT REDUCTION

By reaching our ambitious targets in 2026 we aim to reduce our carbon footprint by 10% to 163.5tCo2e. keep working towards our goal of zero carbon footprint by 2029.

COMMUNITY ENGAGEMENT & PARTNERSHIPS

Maintain membership with Repak and build on our Gold certificate with 50 Shades Greener.

COMMUNITY ENGAGEMENT & PARTNERSHIPS

Continue collaborations with our chosen Charity The Gavin Glynn foundation and increase engagement with local community initiatives like Baggottonia festival

GUEST ENGAGEMENT AND EDUCATION

Encourage guests to participate in sustainability efforts by offering to not have their room serviced. Introduced an environmental information card in guest rooms. Introduced a digital loyalty scheme replacing the paper version.

TECHNOLOGY & INNOVATION

We have introduced digital solutions for Learning development with Fit2Trade, HR & Communications with Alkimii and Accommodation workflow and planning with Maitre. Each of these systems have resulted in a more efficient work flow and reduced our paper usage by 57% since 2023

FOOD WASTE

Utilize every element of a product where suitable. This approach not only helps minimize waste but also maximizes the value derived from the ingredients.

FOOD WASTE

Monitoring and measuring our waste streams allows us to reduce food waste. Our plan is to reduce food waste by 5% to 5.8 tonnes
